van Dantzig involution, Wald couple
$\mathbb{E}e^{sW}\,\mathbb{E}e^{-s^2H}=1$
Galois side
Frobenius traces $a_\rho(p)$
Euler product on $\mathrm{Re}\,s>1$
Gaussian member H_ρ (GGC)
Automorphic side
form f on iy, Hecke eigenvalues
critical line $\mathrm{Re}\,s=\frac{1}{2}$
kernel member W_ρ (Polya)
reciprocity: the two sides
are one function
explicit formula
$2\sin^2$ transport
Hadamard product
GRH = positivity
zeros $\frac{1}{2}\pm i\gamma_k$
Thorin measure $\sum\delta_{\gamma_k^2}$
heat trace $\sum e^{-x\gamma_k^2}$
